

May 28, 2004

Dear Sir/Madam,

Satellite radio is a boon to me whether I am driving locally or on a trip, because commercial radio is wholly inadequate with respect to both news and entertainment. This is a service I pay for because the choices on commercial radio are so poor. It is most annoying that the National Association of Broadcasters, who are unable to provide acceptable quality of programming, now seek to limit those who can. I hope you will reject their petition 04-160. Thank you for your interest in this matter.

Sincerely,

Michael J. Garvey
